

Quick Start Guide

INSTEON® Mini Remote – Wireless Switch

Model: 2342-242/2444A3WH, 2342-442, 2342-542

Getting Started

Fully charge Mini Remote prior to programming (or anytime the unit is not responding) using a Type A to Micro-B USB cable (sold separately). The red Charging LED will turn off once the battery is fully charged (approximately one hour). Slide the power switch to the ON position.

Note: Mini Remote requires an INSTEON dual-band or RF device to communicate with other devices on your INSTEON network. Mini Remote uses a subtle beeper sound to assist setup. It is recommended that you program the unit in a quiet area.

Make Remote a Controller

Use Remote to control other INSTEON devices

- 1) Tap the top of the paddle switch
- 2) Press and hold Mini Remote set button until it beeps
Mini Remote LED will start blinking green
- 3) Turn responder on (or any other state such as on 50% or even off)
- 4) Press and hold responder set button until it double-beeps
Mini Remote will double-beep and its LED will stop blinking
- 5) Confirm that scene addition was successful by tapping the top and bottom paddle on the Mini Remote
Responder load will respond appropriately

Using Mini Remote

Mini Remote switch sends commands to devices linked specifically to the paddle switch. Dimmable responders may behave differently if you tap, double-tap or press and hold the switch paddle to activate/deactivate a scene. Non-dimming responders will only turn full-on or full-off, no matter what method you use.

Tap	Double-tap	Press and hold
Ramp to preset on-level or off	Full-on or full-off instantly	Brighten or dim until released

The Mini Remote Status LED will flash green once for each on/brighten command sent and red once for each off/dim command sent

Warning: Mini Remote is permanently sealed. Do not attempt to open case. Doing so will damage the remote and void the warranty.
